

A low-poly, geometric illustration of a mountain range. The mountains are composed of various triangular facets in shades of orange, brown, and dark grey. The lighting is dramatic, with a bright light source on the left creating a strong glow and casting long shadows. The sky is a dark, gradient blue.

33 Concepts Every JavaScript Developer Should Know

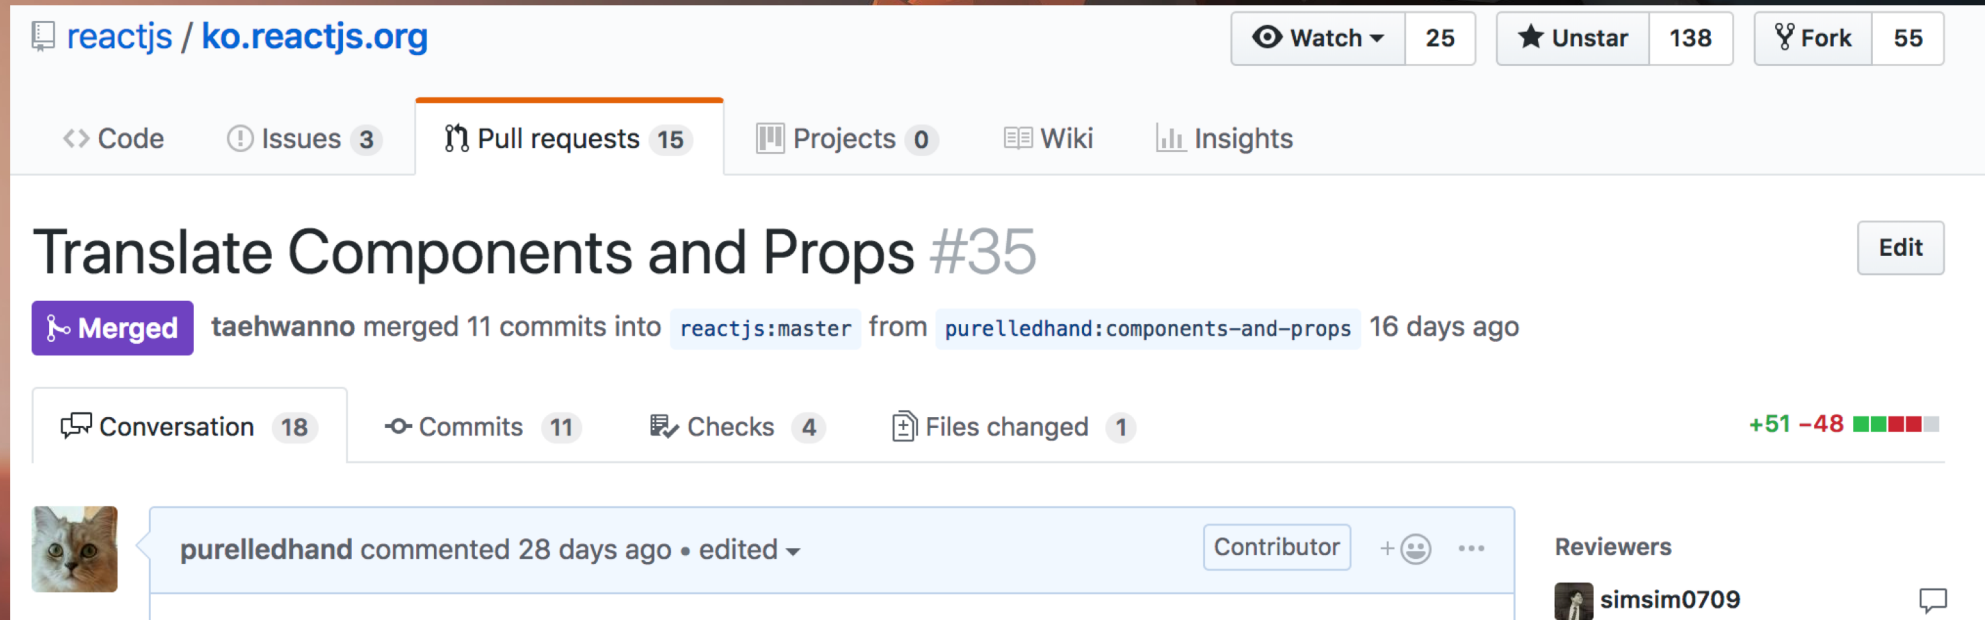

Introduction

This repository was created with the intention of helping developers master their concepts in JavaScript. It is not a requirement, but a guide for future studies. It is based on an article written by [Stephen Curtis](#) and you can read it [here](#).

Considered by GitHub as one of the [top open source projects of 2018!](#)

The screenshot shows a GitHub pull request interface. At the top, the repository is identified as 'reactjs / ko.reactjs.org'. Navigation tabs include 'Code', 'Issues (3)', 'Pull requests (15)', 'Projects (0)', 'Wiki', and 'Insights'. The pull request title is 'Translate Components and Props #35', with an 'Edit' button. A purple 'Merged' badge is present, followed by the text 'taehwanno merged 11 commits into reactjs:master from purelledhand:components-and-props 16 days ago'. Below this, statistics show 'Conversation (18)', 'Commits (11)', 'Checks (4)', and 'Files changed (1)'. A green and red diff indicator shows '+51 -48'. A comment from 'purelledhand' is visible, dated '28 days ago', with an 'edited' status. The 'Contributor' section shows 'purelledhand' and the 'Reviewers' section shows 'simsim0709'.
